

SOCIAL AND CULTURAL COMMITMENT

Creating change together:

“Sustainable waste management” project in India completed

Since 2012, the district of Gagillapur near the Indian metropolis of Hyderabad, has been the home of our Indian production site Shakti Hormann and is part of the Dundigal municipality. We support the comprehensive sustainable development of the region through local projects. After a development phase of more than 3 years together with GIZ* (Gesellschaft für Internationale Zusammenarbeit – German Corporation for International Cooperation) we were finally able to successfully hand over the project “Sustainable waste management” to the community.

From right to left: Mrinalini Shastry, Bhairava Prasad, MRK Raju (Shakti Hormann), Venkatesh Goud (GIZ) and Hrishikesh Mahadev (GIZ) hand the official document over to the community representative.

We would like to thank Mrinalini Shastry and Bhairava Prasad for the project management – they have contributed their expertise and commitment on site to this environment project and thus successfully created the basis for sustainable waste management.

The project

The aims of the project were the establishment of regular waste disposal services and the development of a concept for waste separation.

The interior of the new DRCC (Dry Resource Collection Centre). For this purpose, an area that had been used as an unofficial waste disposal site for a long time was cleaned and a hall was constructed on it. It offers areas for separating dry waste.

The regular waste collection services made a significant difference for the residents of Gagillapur. It also benefits the environment.

Several sets of personal protective equipment (gloves, shoes, vests, masks, etc.) were given to the employees of the new waste disposal service and the DRCC.

Indian practicality and German precision came together to benefit the people of Gagillapur in this special project.”

*Mrinalini Shastry
Project manager and coordinator*

*Our partner **GIZ** is committed to successful and high-quality development cooperation efforts.
