THERMO 46

Front and Side Entrances that give a ClassyLook

Thermo 46 is the ideal choice for residences and comes with an internal door in vestibule form. It is ideal for insulating the indoors both during summer and winter, and is energy efficient – especially suited for air-conditioned environments. The multiple-point locking system is a standard security feature that makes it break-in-resistant. It also has an optional RC 2 security feature.

FINGER PROTECTION DOORS

Designed for Safer Everyday Use

Hörmann Finger Trap Protection Doors are designed to reduce the risk of finger injuries during door operation. An integrated flexible protection profile covers critical gaps between the door leaf and frame, helping prevent accidental finger trapping.

Ideal for environments where safety is non-negotiable, these doors support peace of mind in spaces used by children, patients, & caregivers while maintaining Hörmann's standards of durability and build quality.

Applications

Children's Bedroom

Schools & educational institutions

Healthcare facilities

Crèches & nurseries
